

BEYOND BI

Roambi Flow™

Unlock the flow of your business information.

Traditional business intelligence systems are often used only by a few people, keeping the full value of the information locked up—inaccessible and unactionable by people at all levels of the organization. BI reports and dashboards have been difficult to create and difficult to consume.

Until now.

INTRODUCING ROAMBI FLOW.

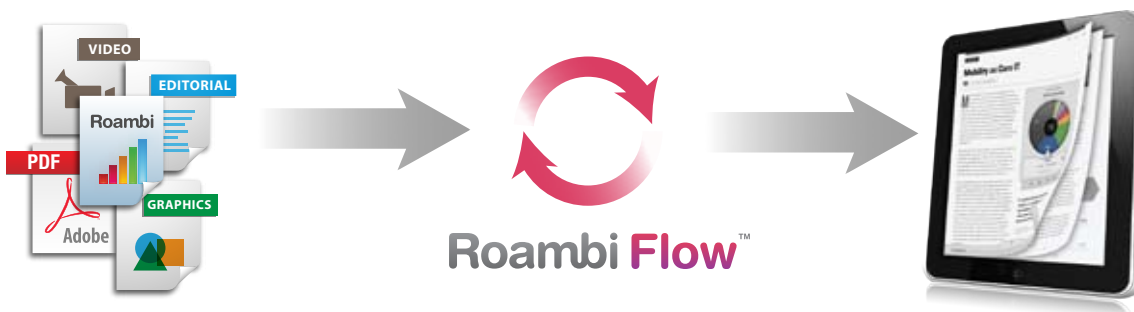

Roambi Flow unlocks all the value of your business information. It is an innovative business app and publishing platform that lets you easily create and share all types of information and intelligence in simple, intuitive and engaging business reports—securely, on the iPad.

Built from the ground up to leverage the unique experience of the iPad, Roambi Flow builds on the power of Roambi Analytics and takes you beyond BI—telling the story behind the numbers, to people at all levels of your organization.

Engaging magazine-style reports and publications
Includes interactive Roambi analytics

Point-and-click publisher
Lets anyone tell the whole story: data, analysis, recommendations

Proven Roambi security
Protects the confidentiality of your critical data and information

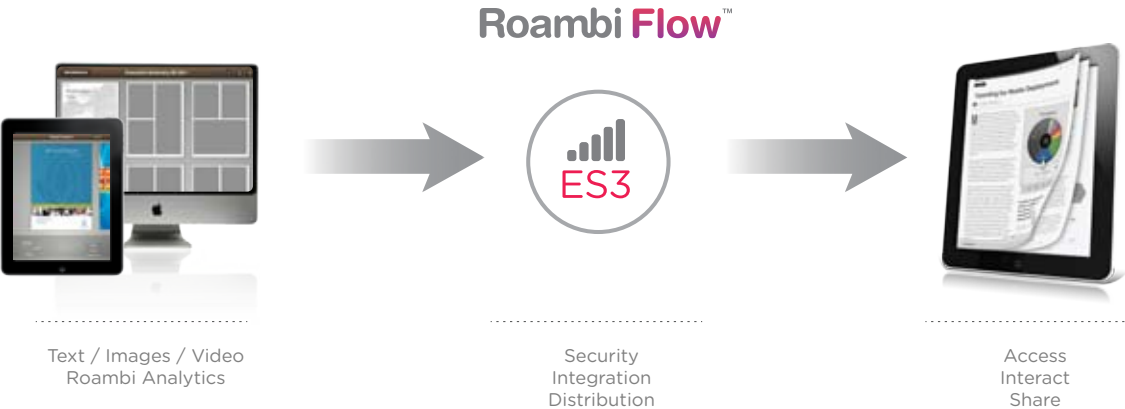

POINT AND CLICK. THEN TAP AND FLIP.

Roambi Flow turns anyone into a publisher for the iPad. Just point-and-click to include Roambi Analytics, with editorial, graphical and collaborative content. Then on-the-go workers can conveniently flip through topics and reports. Tap to focus on the full story, and swipe to analyze the data.

From your iPad or your desktop, you can quickly create and deliver convenient and compelling reports, publications and presentations in two styles.

Book
Integrate Roambi Analytics, text, graphics, and video in a flip-style, digital magazine.

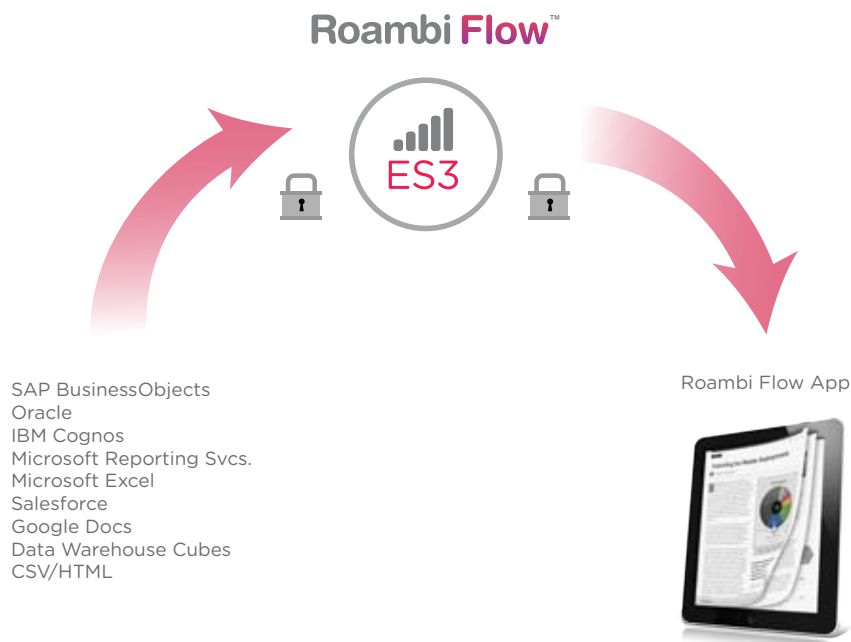

Present
Create engaging multimedia presentations, and share them directly from your iPad.

PROVEN ROAMBI SECURITY.

Built on Roambi Analytics, Roambi Flow ensures the security of your information at every step in the publishing and delivery process. From your existing data servers and BI system, all the way down to the iPad—and everywhere in between. Roambi's end-to-end security features let you deliver your critical information, without risking its confidentiality.

Roambi Flow requires Roambi ES3, the leading business app for interactive mobile analytics.
